

## Compilers

**David N. Cole** is Research Biologist with the Aldo Leopold Wilderness Research Institute, Rocky Mountain Research Station, located on The University of Montana campus in Missoula, MT. Dr. Cole has A.B. and Ph.D. degrees in geography from the University of California, Berkeley, and the University of Oregon. He has been conducting research on wilderness and its management since the mid-1970's.

**Stephen F. McCool** is Professor, Wildland Recreation Management at the School of Forestry, The University of Montana in Missoula, MT. He holds a B.S. degree in forestry from the University of Idaho and M.S. and Ph.D. degrees from the University of Minnesota. His research and applications projects concern wilderness and protected area management and planning, focusing on management systems, applications of social science to management, public participation, and sustainability questions.

**William (Bill) T. Borrie** is Associate Professor and Program Coordinator, Outdoor Recreation Management in the School of Forestry, The University of Montana. Dr. Borrie received a Ph.D. from the College of Natural Resources, Virginia Tech, and has masters and bachelors degrees from the School of Forestry, University of Melbourne, Australia. His research interests are focused on the outdoor recreation experience and on the meanings of parks and wilderness.

**Jennifer O'Loughlin** holds a B.A. in journalism and history and an M.S. in environmental studies from The University of Montana. After serving for 10 years as editor of the natural resource journal *Western Wildlands*, she turned to a life of free-lance writing and editing.

### Pesticide Precautionary Statement

This publication reports research involving pesticides. It does not contain recommendations for their use, nor does it imply that the uses discussed here have been registered. All uses of pesticides must be registered by appropriate State and/or Federal agencies before they can be recommended.

CAUTION: Pesticides can be injurious to humans, domestic animals, desirable plants, and fish or other wildlife—if they are not handled or applied properly. Use all pesticides selectively and carefully. Follow recommended practices for the disposal of surplus pesticides and pesticide containers.
