

Wilderness.net's Mission Mountains Wilderness Fact Sheet

Introduction

The United States Congress designated the Mission Mountains Wilderness in 1975 and it now has a total of 74,524 acres. All of the wilderness is in Montana and is managed by the Forest Service.

Description

The Mission Mountains are a land of ragged peaks with snow on them most of the year, small active glaciers, alpine lakes, meadows, clear streams that run icy cold, slab-like boulders, vertical cliff faces, and talus slopes. The average elevation is 7,000 feet. In the northern portion you'll find the terrain less severe and more heavily timbered. The southern portion, however, receives more visitors, primarily around the alpine lakes (most of which do not thaw until mid-June). The dense forest includes pine, fir, larch, and western red cedar. In summer high basins are painted with a sea of wildflowers. The Flathead and Pend Oreille Indians once hunted, fished, gathered berries, and sought visions (they would go into the Wilderness alone, often depriving themselves of food and water, in hopes of seeing a vision) in the rough and broken Mission Mountains. The first organized exploration of this area did not occur until 1922, after which part of the region was set aside as the Mission Mountains Primitive Area in 1931 and then expanded in 1939. The Wilderness you see today stretches for about 30 miles and varies from two to six miles in width. Wildlife lives in abundant numbers in the Missions: elk and deer, black bears and grizzly bears, mountain goats and mountain lions, a few gray wolves, and a wealth of smaller furbearing animals. Approximately 50 species of birds have been identified, including bald eagles. A small population of fish is generally confined to the lakes. About 45 miles of maintained trails are used almost exclusively by backpackers, the terrain being generally unsuitable for horses. Few of the trails are easy, and many are tremendously steep. There is no overnight camping at Glacier, Upper or Lower Cold Lakes. The area shares its entire western and southern boundaries with the Flathead Indian Reservation. A permit must be obtained from the Confederated Salish and Kootenai Tribes to enter the Mission Mountains Tribal Wilderness

Leave No Trace

How to follow the seven standard Leave No Trace principles differs in different parts of the country (desert vs. Rocky Mountains). Click on any of the principles listed below to learn more about how they apply in the Mission Mountains Wilderness.

1. [Plan Ahead and Prepare](#)
2. [Travel and Camp on Durable Surfaces](#)
3. [Dispose of Waste Properly](#)
4. [Leave What You Find](#)
5. [Minimize Campfire Impacts](#)

6. [Respect Wildlife](#)
7. [Be Considerate of Other Visitors](#)

Area Management

The Mission Mountains Wilderness is part of the 110 million acre National Wilderness Preservation System. This System of lands provides clean air, water, and habitat critical for rare and endangered plants and animals. In wilderness, you can enjoy challenging recreational activities like hiking, backpacking, climbing, kayaking, canoeing, rafting, horse packing, bird watching, stargazing, and extraordinary opportunities for solitude. You play an important role in helping to *"secure for the American people of present and future generations the benefits of an enduring resource of wilderness"* as called for by the Congress of the United States through the Wilderness Act of 1964. Please follow the requirements outlined below and use Leave No Trace techniques when visiting the Mission Mountains Wilderness to ensure protection of this unique area.

General Wilderness Prohibitions

Motorized equipment and equipment used for mechanical transport is generally prohibited on all federal lands designated as wilderness. This includes the use of motor vehicles, motorboats, motorized equipment, bicycles, hang gliders, wagons, carts, portage wheels, and the landing of aircraft including helicopters, unless provided for in specific legislation.

In a few areas some exceptions allowing the use of motorized equipment or mechanical transport are described in the special regulations in effect for a specific area. Contact the Forest Service office or visit the websites listed below for more specific information.

These general prohibitions have been implemented for all national forest wildernesses in order to implement the provisions of the Wilderness Act of 1964. The Wilderness Act requires management of human-caused impacts and protection of the area's wilderness character to insure that it is "unimpaired for the future use and enjoyment as wilderness." Use of the equipment listed as prohibited in wilderness is inconsistent with the provision in the Wilderness Act which mandates opportunities for solitude or primitive recreation and that wilderness is a place that is in contrast with areas where people and their works are dominant.

Wilderness-Specific Regulations

Wilderness managers often need to take action to limit the impacts caused by visitor activities in order to protect the natural conditions of wilderness as required by the Wilderness Act of 1964. Managers typically implement 'indirect' types of actions such as information and education measures before selecting more restrictive measures. When regulations are necessary, they are implemented with the specific intent of balancing the need to preserve the character of the wilderness while providing for the use and enjoyment of wilderness.

The following wilderness regulations are in effect for this area. Not all regulations are in effect for every wilderness. Contact the Forest Service office or visit the websites listed on the 'Links' tab for more specific information about the regulations listed.

ALL VISITORS

-- The Mission Mountains are grizzly bear country and proper storage of food and bear attractants is required for visitor safety and to protect bears. All human, pet, and livestock food (except baled or cubed hay without additives) and garbage must be stored in approved bear-resistant containers, attended, or hung at least 10 feet off the ground and four feet out from any upright support (trees, poles, etc.).

-- Please do not leave coolers – even if they are empty – or garbage outside your vehicle (in a pickup bed for example) at the trailhead.

-- Do not attempt to burn garbage or attractants in a campfire.

-- Storing equipment, personal property, or supplies (caching) is prohibited. Wilderness visitors may set up a base camp and travel from that camp to other spike camps during the course of one visit, but cannot leave any camps or equipment behind when leaving the Wilderness. This includes leaving such equipment as game cameras.

-- Mechanical transportation (including wheelbarrows, strollers, bicycles, game carts, or other vehicles) is prohibited.

OVERNIGHT VISITORS

-- Maximum length of stay is 14 days. Wilderness visitors may not camp in any one location for more than 14 accumulated days during any 30-day period. Any camp relocations within the 30-day period must be at least 5 air miles from the previous campsite. Camping for more than 30 days within the same calendar year is prohibited.

-- Camping is prohibited within 1/4 mile of the shores of Glacier and Upper and Lower Cold Lakes.

-- Overnight camping is prohibited at all restoration sites. These sites are found at many lakes in the Mission Mountains and are marked with signs that read "Wilderness Restoration Site, No Camping." These sites have been damaged by over use and are closed to restore native ground cover and vegetation. Please find other suitable campsites.

STOCK USERS

-- All pack or saddle stock feed must be certified weed seed free. Weed seed free products must be certified as being noxious weed seed free by an authorized State of Department of Agriculture official or designated county official; each individual bale or container must be tagged or marked as weed free and reference the written certification.

-- Containment of pack and saddle stock is prohibited within 200 feet of all lakes in the Mission Mountains Wilderness. Containment is defined as grazing, herding, tying, picketing, tethering, hobbling, or hitching. Campsites in these areas may be used, but please remove stock from the site as soon as they are loaded or unloaded.
