

Wilderness.net's Boulder Creek Wilderness Fact Sheet

Introduction

The United States Congress designated the Boulder Creek Wilderness in 1984 and it now has a total of 19,911 acres. All of the wilderness is in Oregon and is managed by the Forest Service.

Description

Small waterfalls and rapids connect the series of quiet pools that make up Boulder Creek, a tributary of the North Umpqua River. Ponderosa pines flourish on Pine Bench, near the lower end of the Wilderness, and are thought to be the largest such stand this far northwest of the crest of the Cascade Mountains. The rocky monoliths and outcroppings attract (and challenge) technical rock climbers, especially in the southern portion's Umpqua Rocks Special Interest Geologic Area. Elevations range from 1,600 feet to 5,600 feet. The Spring Fire in 1996 and the Rattle Fire in 2008 burned most of this wilderness area. Expect rapid brush growth and persistent blowdown on the 10 miles of maintained trails in the years to come.

Leave No Trace

How to follow the seven standard Leave No Trace principles differs in different parts of the country (desert vs. Rocky Mountains). Click on any of the principles listed below to learn more about how they apply in the Boulder Creek Wilderness.

1. [Plan Ahead and Prepare](#)
2. [Travel and Camp on Durable Surfaces](#)
3. [Dispose of Waste Properly](#)
4. [Leave What You Find](#)
5. [Minimize Campfire Impacts](#)
6. [Respect Wildlife](#)
7. [Be Considerate of Other Visitors](#)

Area Management

The Boulder Creek Wilderness is part of the 110 million acre National Wilderness Preservation System. This System of lands provides clean air, water, and habitat critical for rare and endangered plants and animals. In wilderness, you can enjoy challenging recreational activities like hiking, backpacking, climbing, kayaking, canoeing, rafting, horse packing, bird watching, stargazing, and extraordinary opportunities for solitude. You play an important role in helping to *"secure for the*

American people of present and future generations the benefits of an enduring resource of wilderness" as called for by the Congress of the United States through the Wilderness Act of 1964. Please follow the requirements outlined below and use Leave No Trace techniques when visiting the Boulder Creek Wilderness to ensure protection of this unique area.

General Wilderness Prohibitions

Motorized equipment and equipment used for mechanical transport is generally prohibited on all federal lands designated as wilderness. This includes the use of motor vehicles, motorboats, motorized equipment, bicycles, hang gliders, wagons, carts, portage wheels, and the landing of aircraft including helicopters, unless provided for in specific legislation.

In a few areas some exceptions allowing the use of motorized equipment or mechanical transport are described in the special regulations in effect for a specific area. Contact the Forest Service office or visit the websites listed below for more specific information.

These general prohibitions have been implemented for all national forest wildernesses in order to implement the provisions of the Wilderness Act of 1964. The Wilderness Act requires management of human-caused impacts and protection of the area's wilderness character to insure that it is "unimpaired for the future use and enjoyment as wilderness." Use of the equipment listed as prohibited in wilderness is inconsistent with the provision in the Wilderness Act which mandates opportunities for solitude or primitive recreation and that wilderness is a place that is in contrast with areas where people and their works are dominant.

Wilderness-Specific Regulations

Wilderness managers often need to take action to limit the impacts caused by visitor activities in order to protect the natural conditions of wilderness as required by the Wilderness Act of 1964. Managers typically implement 'indirect' types of actions such as information and education measures before selecting more restrictive measures. When regulations are necessary, they are implemented with the specific intent of balancing the need to preserve the character of the wilderness while providing for the use and enjoyment of wilderness.

The following wilderness regulations are in effect for this area. Not all regulations are in effect for every wilderness. Contact the Forest Service office or visit the websites listed on the 'Links' tab for more specific information about the regulations listed.

ALL VISITORS

- Group size is limited no more than 12 per party, in any combination of people and pack or saddle stock.
- Pack out all debris, garbage, or other waste.
- Do not camp in or enter areas closed for vegetation rehabilitation.
- Storing equipment, personal property, or supplies (caching) is prohibited.
- As with all designated Wilderness, mechanical transportation (including wagons, game carts, or other vehicles) is prohibited.
